PROFESSIONAL SUMMARY

AI-native product builder with experience taking products from 0→1. Co-built PMOrbit as one of two primary contributors, delivering an executive portfolio and project management platform supporting leaders across 40+ teams. Experienced in product discovery, AI-powered capabilities, and translating customer problems into measurable outcomes.

EXPERIENCE

RealPage

Product & Delivery Intern

Hyderabad, India

Nov 2024 – Nov 2025

- Co-built PMOrbit from 0→1 as one of two primary contributors, replacing fragmented workflows across Jira, Asana, and Monday.com with a centralized platform supporting directors, VPs, and managers across 40+ teams.
- Partnered with project managers, solution architects, directors, and VPs to translate ambiguous business needs into requirements, user stories, and prioritized roadmap initiatives aligned with customer and business outcomes.
- Delivered AskOrbit, an Azure OpenAI + RAG-powered assistant enabling natural-language access to project health, KPIs, RAID logs, stakeholder information, and automated communication workflows.
- Built role-aware dashboards, portfolio views, and automated RAID logs that reduced project handoff friction by 40%.
- Improved executive dashboard performance by 97.3%, reducing load times from 30 seconds to 800 ms.
- Participated in incident triage, root-cause analysis, and bug prioritization efforts to improve reliability, customer trust, and overall product quality.

PROJECTS

MockIN — AI-Powered Mock Interview Platform

- Built an AI-powered interview platform using Gemini API with personalized question generation, AI feedback, grading, and session history tailored to role and experience level.
- Integrated face-tracking algorithms to enhance interview realism and deliver an end-to-end AI-assisted learning experience.

KeyStay — AI-Powered Vacation Rental Management Platform

- Defined an MVP centered on AI-driven guest interactions and predictive analytics after identifying fragmented communication and booking workflows as core customer pain points.
